**Multiplication Facts** – Many students did not do well on their second multiplication quiz. Most of them are being held back by not knowing their multiplication facts. It is very important that they study their facts every day. Also, we started division this week and it will be confusing for students who do not know their multiplication facts. I will give them one final chance to pass the multiplication test on next Thursday before report cards are due.

Example Quiz Problems:  $26 \times 3$ ,  $158 \times 6$ ,  $74 \times 59$ ,  $192 \times 84$

**Math Challenge** – The math fact challenge was this Wednesday. Students who pass the test receive a certificate.

**Grading Day** – Grading day is on Friday so students will not have school.
